Res Mechanica **21** (1987) 401–402

CONTENTS OF VOLUME 21

Number 1

Creep Strain–Time Parameters at High Temperatures for Coated and Uncoated MM-509. 1
W. KLEEMANN (Federal Republic of Germany)

On Thermomechanical Zaremba Schemes of Hysteresis 21
P. PEGON (Italy) and P. GUÈLIN (France)

Low-cycle Fatigue and Cyclic Creep of High-pressure Vessel Shell Materials in Multiaxial Stress State 35
F. F. GIGINYAK, YU. I. ZVEZDIN, A. A. LEBEDEV and B. T. TIMOFEEV (USSR)

Influence of Stress and Temperature Changes on the Creep Damage Rate . . 55
E. EL-MAGD, S. PANTELAKIS and K. JÄGER (Federal Republic of Germany)

On Experimental Testing Methods for Anisotropic Materials 73
J. P. BOEHLER, L. EL AOUFI and J. RACLIN (France)

Number 2

Computer Code for Strain–Stress Behaviour and Collapse of Power Reactor Fuel Clads 97
I. S. GOLOVNIN, YU. K. BIBILASHVILI, A. V. MEDVEDEV and S. M. BOGATYR (USSR)

The CANSIM Bundle/Channel Model for Transients 109
H. E. SILLS and J. D. ALLAN (Canada)

Dynamic Behaviour and Stability of Thin Hemispherical Shells Fluid-coupled with a Vessel 117
M. GUIGGIANI, P. VIGNI and G. GARUTI (Italy)

Evaluation of the Creep–Fatigue Behaviour of 2 1/4 Cr–1 Mo Steel by a Continuous Damage Approach 135
R. GOMUC, T. BUI-QUOC and A. BIRON (Canada)

On the Creep Behavior of Solid-Solution Alloys 155
MAHMOUD S. SOLIMAN (Saudi Arabia)

Microstructure Effects and Modelling of Incoloy 800 Behaviour 165
P. DUMAZ, C. REGNARD, G. ROBERT and J. M. TERRIEZ (France)

Book Reviews 191

Res Mechanica (**21**) (1987)—© Elsevier Applied Science Publishers Ltd, England, 1987. Printed in Northern Ireland

Number 3

Probability Model of Flow Area Blockage in VVER-type Assemblies under Accident Conditions 195
V. I. SOLYANY, YU. K. BIBILASHVILI, O. A. NECHAEVA and A. V. SALATOV (USSR)

The Crystalline to Amorphous Transition of Intermetallic Compounds Under Electron Irradiation—a Review 207
D. E. LUZZI and M. MESHII (USA)

The Interaction of Surface and Interior to Produce Bauschinger Behavior in 70–30 α-Brass Single Crystals Oriented for Easy Glide 249
ZHIRUI WANG and HAROLD MARGOLIN (USA)

Number 4

Prolegomena to the Lectures in Engineering Science 287

Origin of the Theory of Vibrating Systems 291
CLIFFORD AMBROSE TRUESDELL III (USA)

Theory of Nonlocal Elasticity and Some Applications 313
A. CEMAL ERINGEN (USA)

Irreversibility and Space–Time Structure 343
I. PRIGOGINE (Belgium)

The Laws of Thermodynamics 361
JAMES SERRIN (USA)

Continuum Theory of Nematic Liquid Crystals 381
J. L. ERICKSEN (USA)

On Past Developments, Current Activities and Future Directions in Plasticity . 393
DANIEL C. DRUCKER (USA)
